

Chief, FDD

25X1A

I talked to [REDACTED] who concurs in the attached proposed covers for the classified and unclassified CTS, with the exception that he thinks that the classified should have red borders and red writing as noted in his hand-writing on same. The thought behind this is that he is going to try and institute a procedure whereby all present DD/I publications, in instances like this where there is a classified and unclassified, will have red borders on that part which remains classified. This being the case, it would seem that maybe we should put the red border on the NOFOR supplement. However, I did not discuss this last item with [REDACTED]
